To Whom It May Concern,

The 2nd Annual Center for Experimental Archaeology primitive “knap-in” will be taking place for one day outside of the Interpretive Center at Washington’s Crossing State Park, New Jersey on Sunday, October 23rd. Thank you to all you participated in last year’s event; please regard this letter as another call for participation/demonstration.

This event is a wonderful opportunity for a continued dialogue and exchange of ideas, technologies, and stories amongst primitive technologists as well as an excellent forum for public education. Please come prepared to participate in both of these arenas. It is not often that the public gets the opportunity to witness, interact with, and experience primitive skills and it is our responsibility to represent and promote our craft(s) accurately and selflessly. I look forward to your participation.

We would like to have as many people/groups presenting as possible. So, any of you who know ahead of time that you will be coming, please let me know as soon as possible. All primitive skills are welcome.

Feel free to contact me with any questions/concerns you may have. Also, please pass this information on to any you think may be interested. For further and continually updated information, please visit: www.experimentalarchaeology.org or call at 908.627.1568.

Respectfully,

Bill Schindler
